

Corrugated polycarbonate is a popular choice for greenhouse roofing due to its durability, strength, and ability to let in natural light. It is also resistant to UV rays and can last for many years. When installing, it's important to use the correct fasteners and techniques to ensure a secure fit. The final result is a sturdy, long-lasting greenhouse structure that can protect your plants from the elements while providing them with the light they need to thrive.

Company introduction

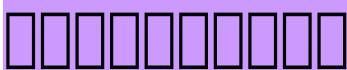

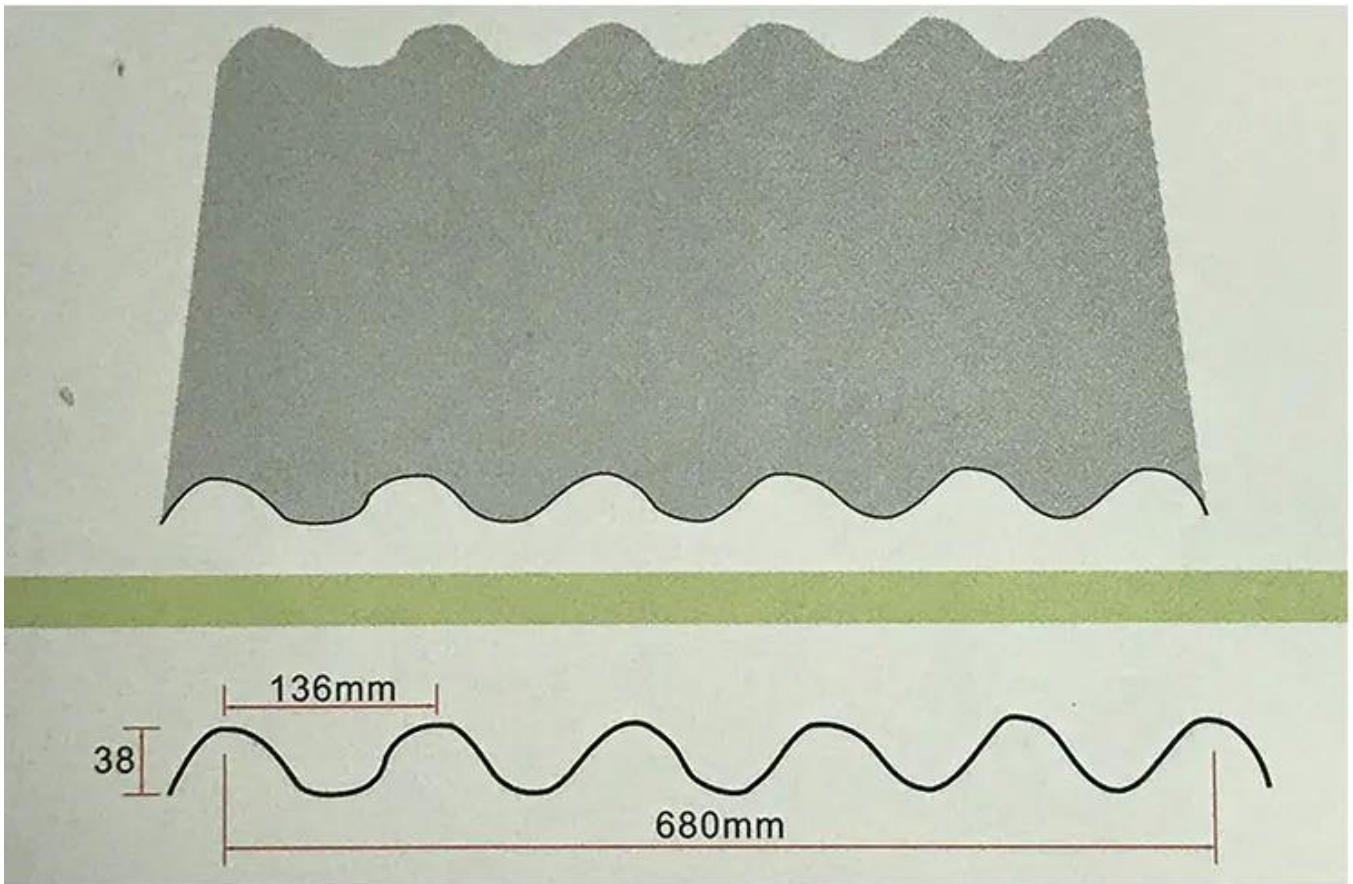

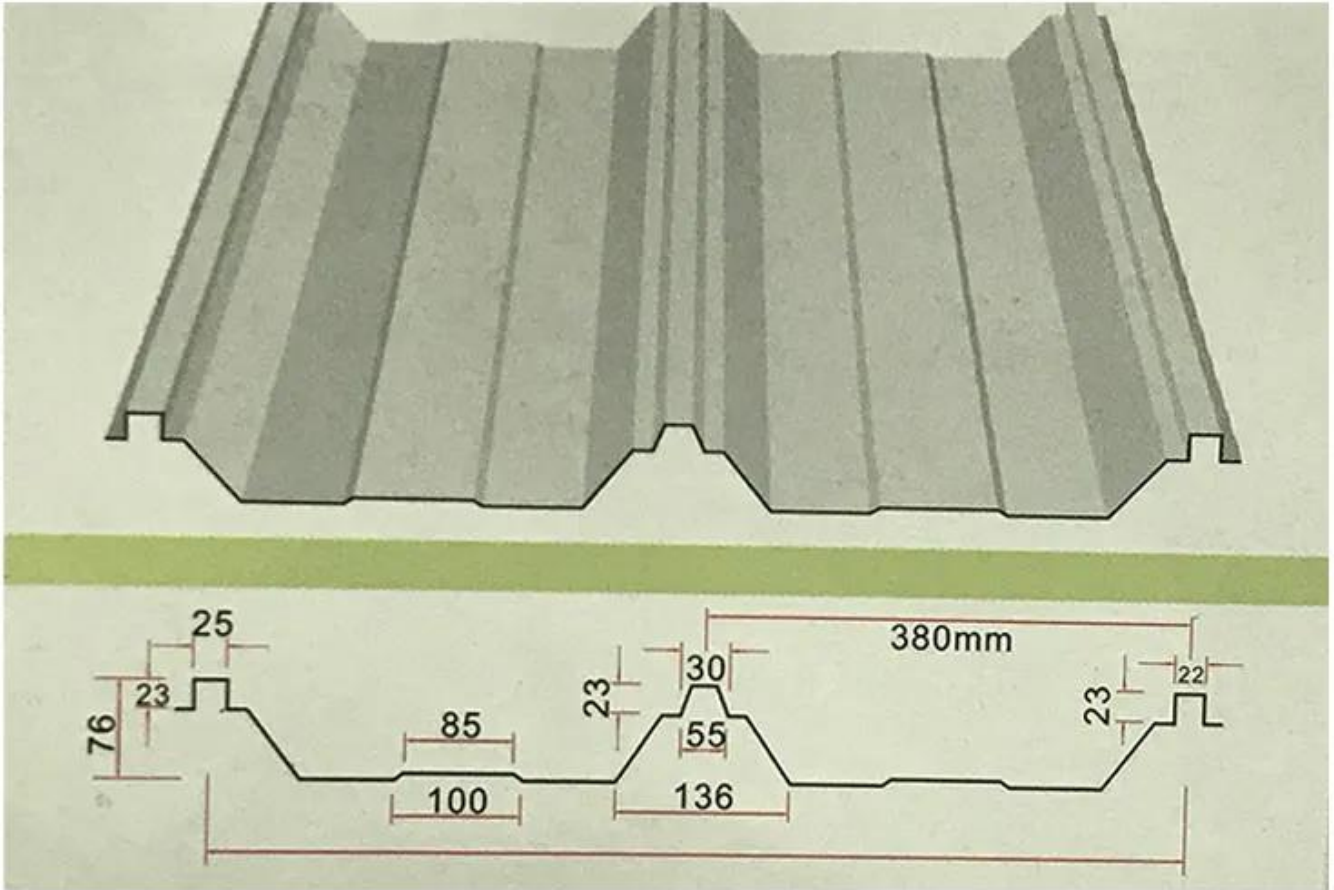

Our Factory

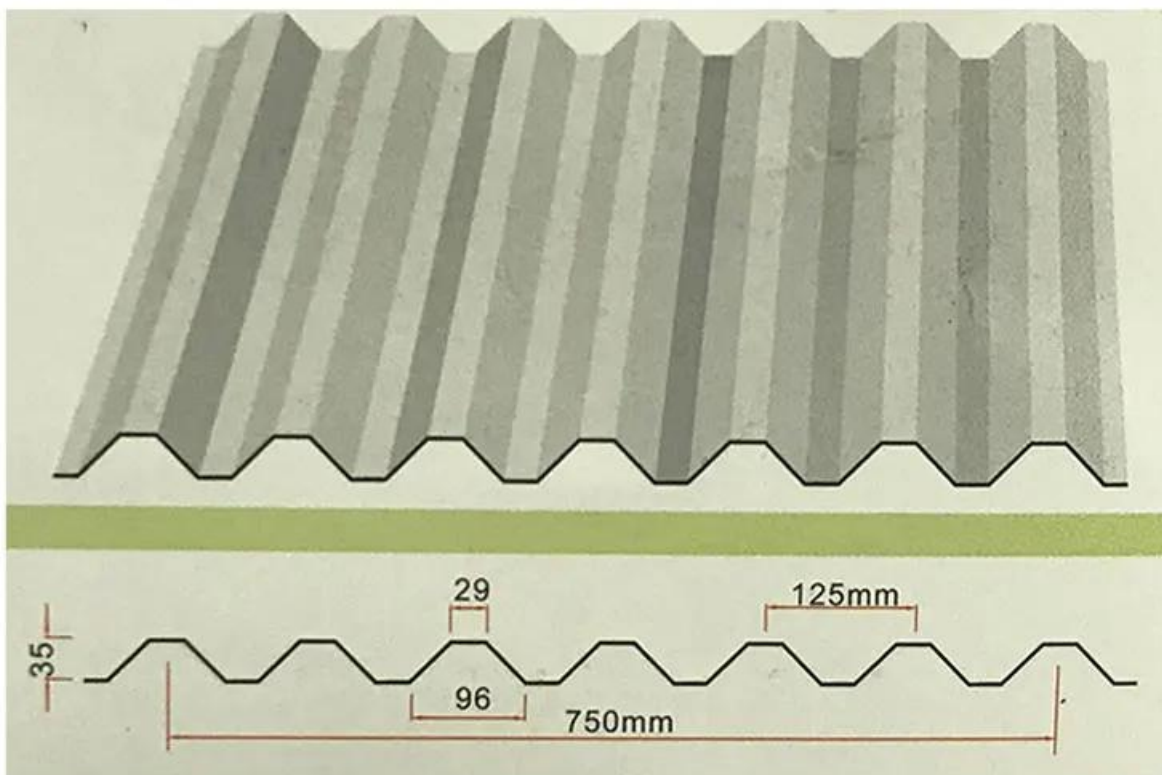

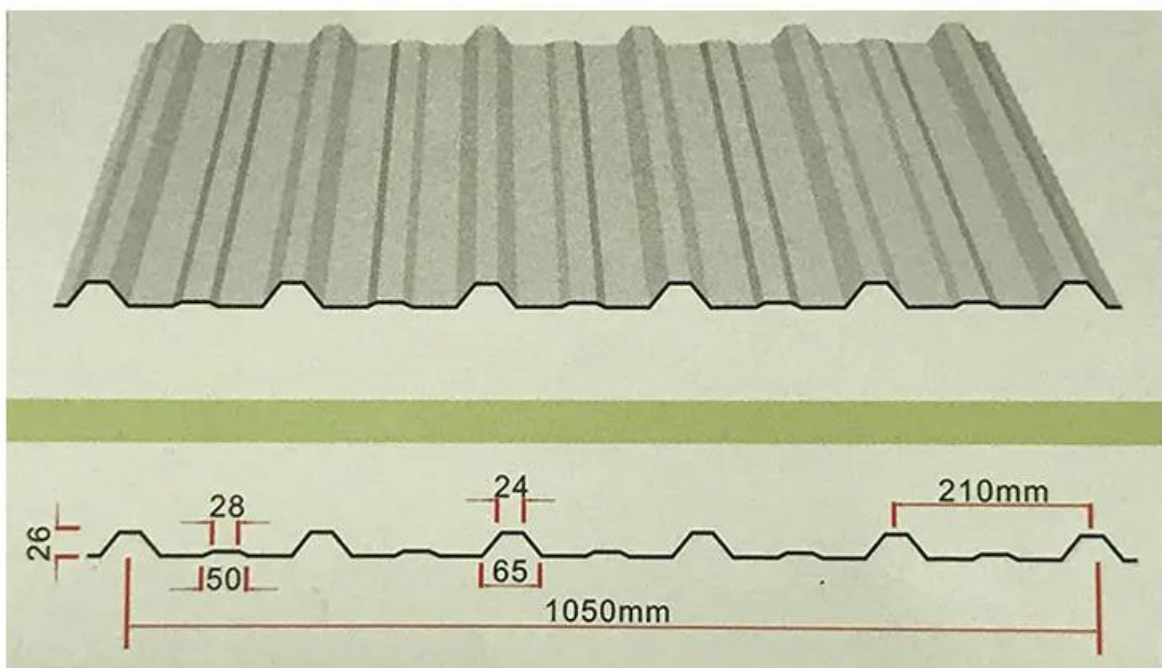

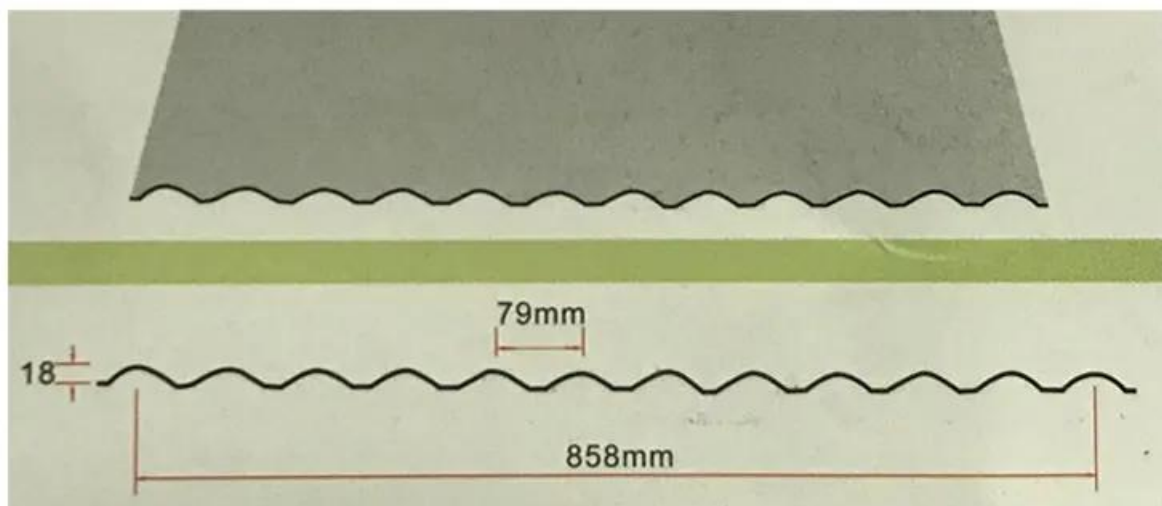

Zhongxingcheng 中興成 Co. , 中國廣東省佛山市南海區
 生產各種規格、顏色、厚度的ASA, APVC 擠塑板、
 擠塑瓦、擠塑管、擠塑棒、擠塑塊、擠塑磚、FRP, 擠塑板,
 擠塑瓦、擠塑管、擠塑棒、擠塑塊、擠塑磚 PC
