

Corrugated polycarbonate is a popular choice for greenhouse roofing due to its durability, strength, and ability to let in natural light. It is also resistant to UV rays and can last for many years. When installing, it's important to use the correct fasteners and spacing to ensure a secure fit. The finished structure should be checked for leaks and proper ventilation.

Company introduction

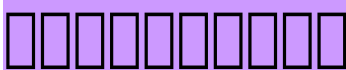

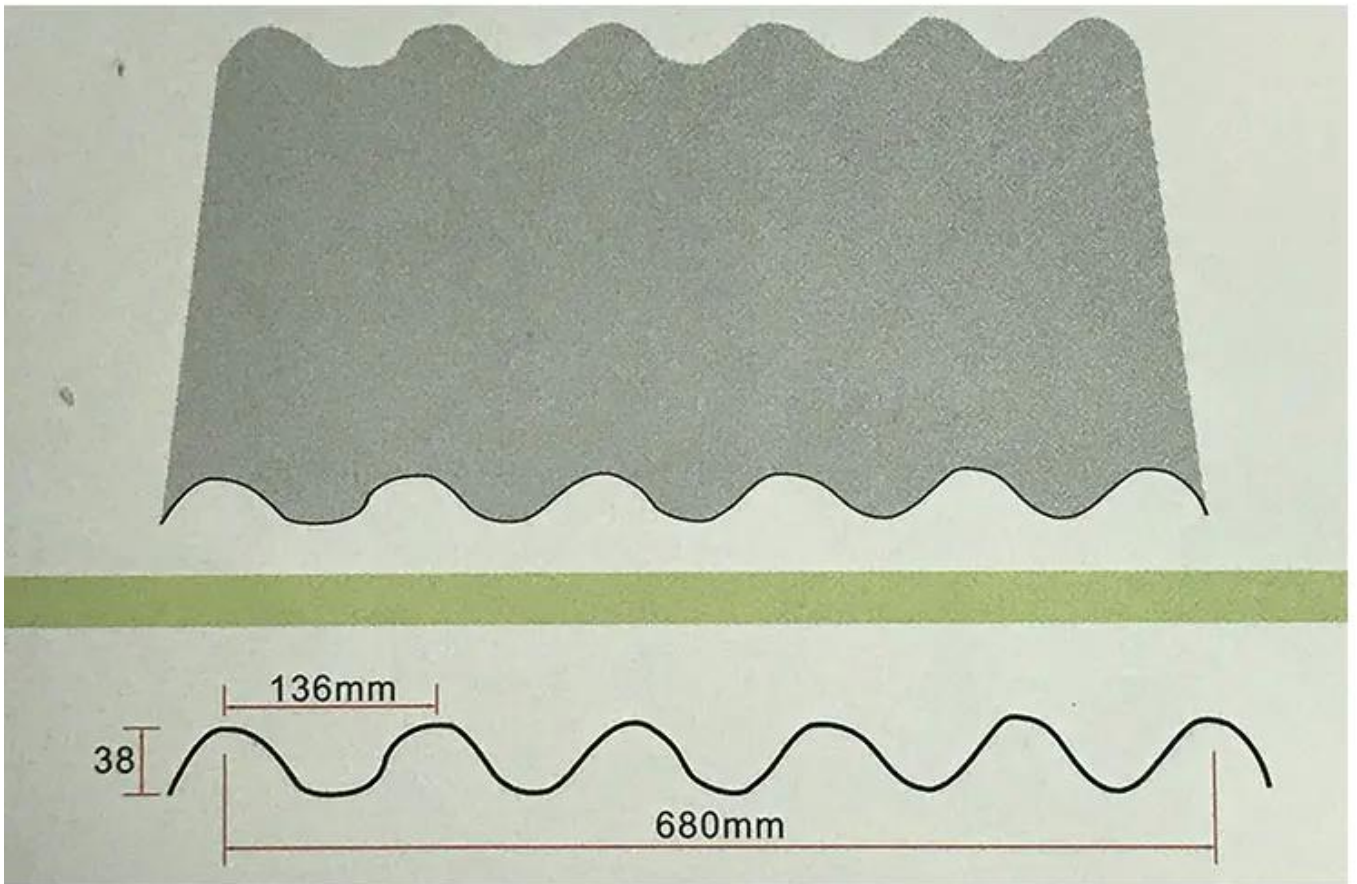

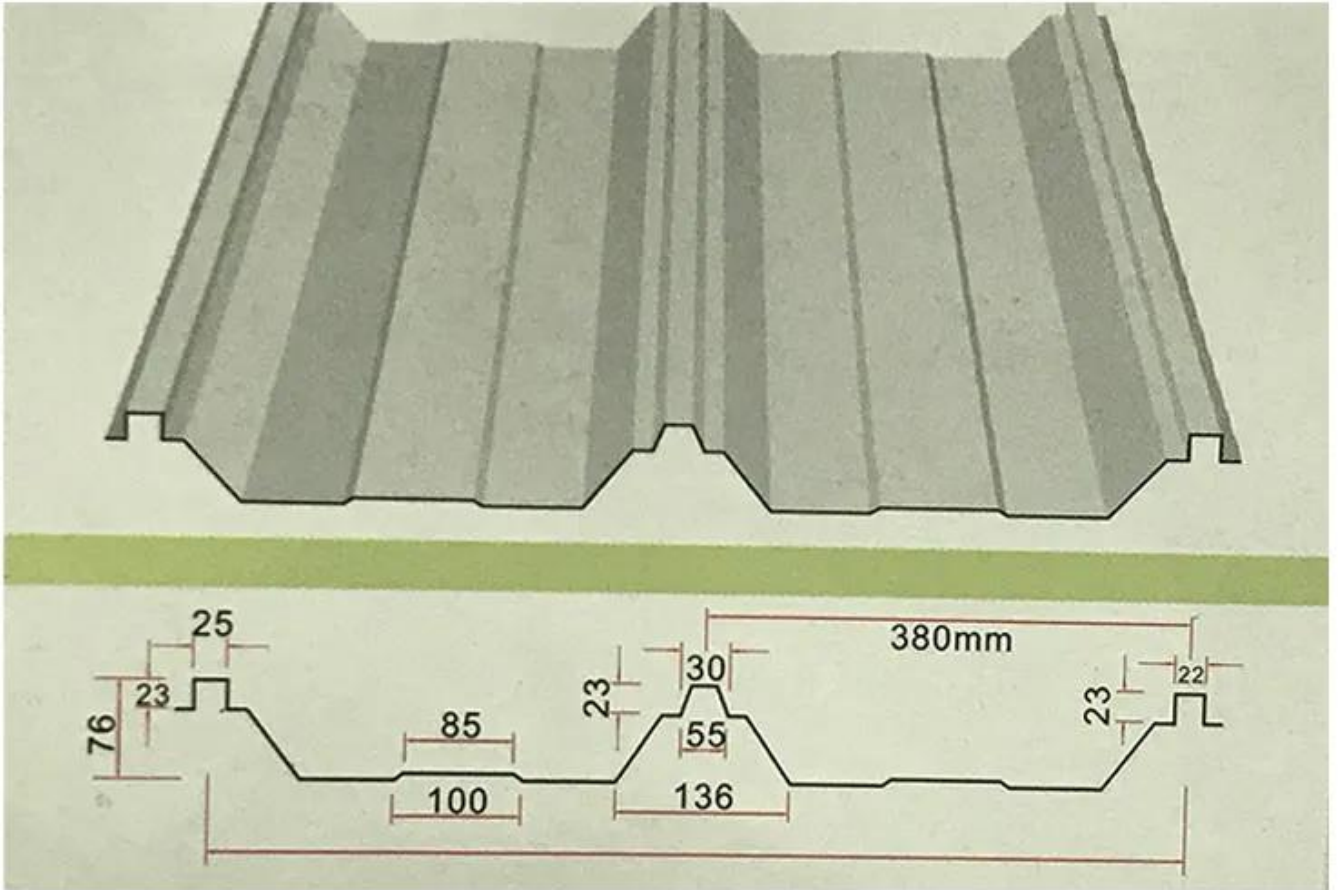

Our Factory

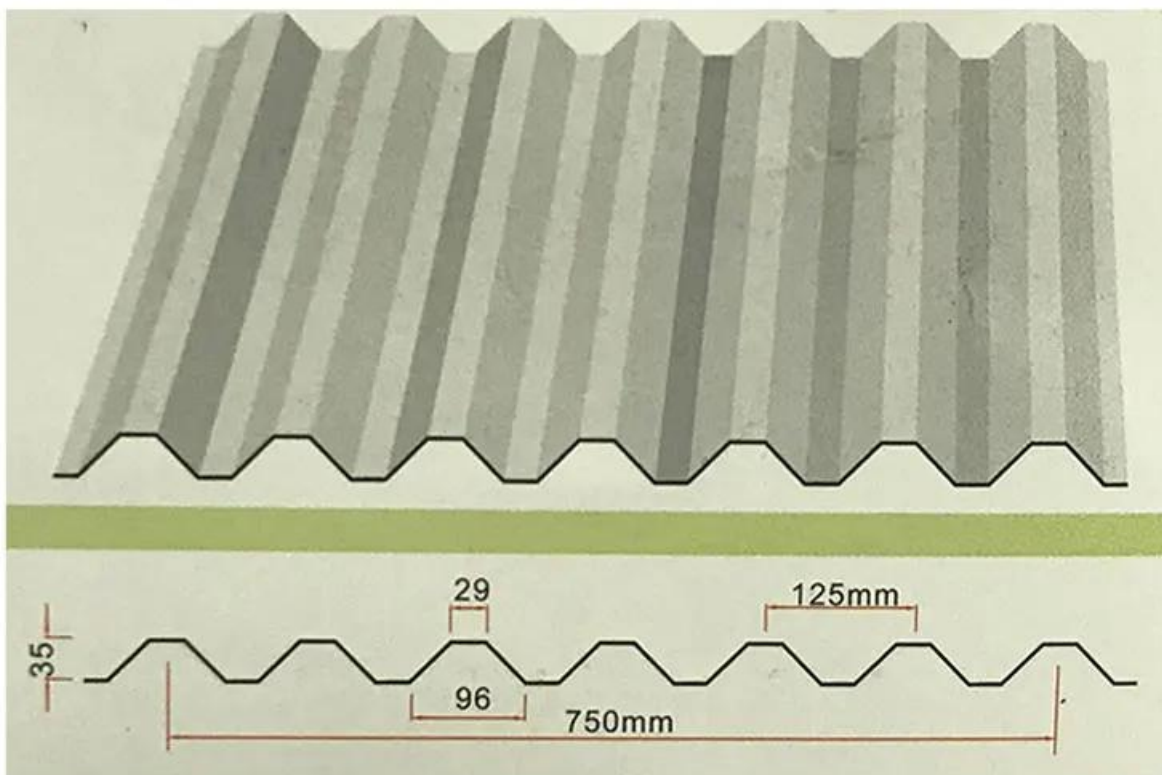

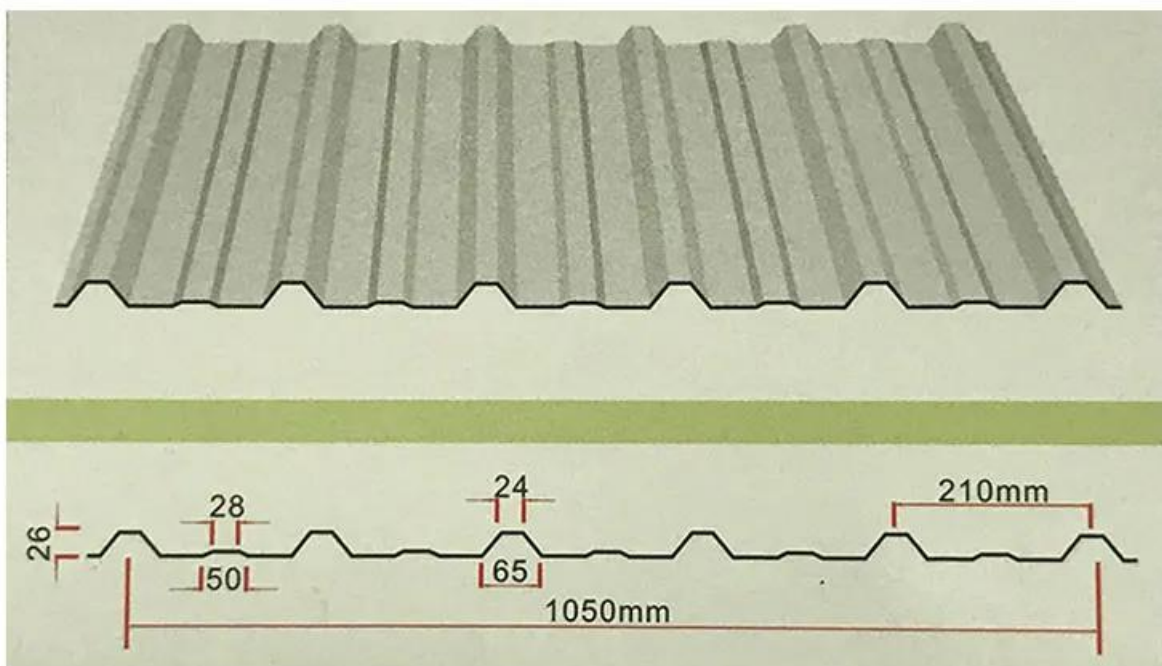

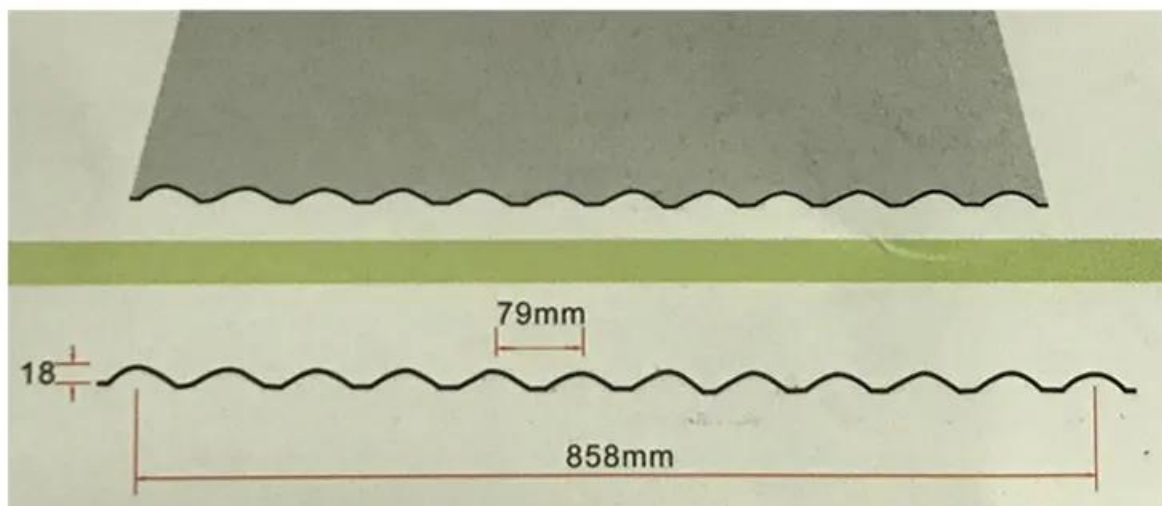

Zhongxingcheng 中興成 Co. , 中國廣東省佛山市南海區
 生產各種規格、顏色、厚度的ASA, APVC 擠塑板、泡沫板、
 保溫板、防腐板、FRP, 玻璃鋼, 各種規格、顏色、厚度的PC
